Forward Looking Statements

Certain statements made during this presentation, as well as included in this document, are not historical facts and may be considered “forward-looking statements” and are based on estimates, assumptions and projections which management believes are reasonable but by their nature subject to risks and uncertainties. The Private Securities Litigation Reform Act of 1995 provides a safe harbor for forward-looking statements.

The reasons which could cause actual results and/or financial condition to differ materially from those suggested by such forward-looking statements include but are not limited to those discussed or identified from time-to-time in AFG’s filings with the Securities and Exchange Commission, including the annual report on Form 10-K and the quarterly reports on Form 10-Q. We do not promise to update such forward-looking statements to reflect actual results or changes in assumptions or other factors that could affect these statements.

Core net operating earnings is a non-GAAP financial measure which sets aside items that are generally not considered to be part of ongoing operations, such as net realized gains and losses, as well as other significant items that are not able to be estimated with reasonable precision, or that may not be indicative of ongoing operations. AFG believes that this non-GAAP measure is a useful tool for investors and analysts in analyzing ongoing operating trends of AFG.

Alternative Investments¹
Total = \$2.4 Billion
(16% of total investments)

1% annualized return in 4Q23; 7% YTD estimated to be approximately 6% for the full year 2024

¹ Alternative investments consist of investments accounted for using the equity method, equity securities MTM through investment income and AFG managed CLOs.

Investment Portfolio Characteristics

	P&C Portfolio 12/31/23
Approximate Duration – Fixed Maturities including cash & cash equivalents	2.9 years
Annualized yield on fixed maturity securities before investment expenses	
Quarter ended 12/31/2023:	4.99%

Annualized yield is calculated by dividing investment income for the quarter by the average cost over the quarter. Average cost is the average of the beginning and ending quarter asset balances.

Positioning & Outlook

Short Duration – Increased duration of P&C fixed maturity portfolio in the higher interest rate environment, including cash and cash equivalents, from approximately 2.0 years at 12/31/2021 to approximately 2.9 years at 12/31/2023.

- Insurance company fixed maturities duration (including cash) remains short relative to liability duration.

Low Credit Risk – Significant capacity for AFG to take advantage of wider spreads offered in times of market disruption.

- AFG’s current reinvestment rate in its P&C fixed maturity portfolio is approximately 5.5%.

Strong Financial Position

As of December 31, 2023

Protecting What Matters

We sustain AFG’s business success by effectively managing risk—financial, social, environmental—to help create stability for our customers and deliver value to our shareholders.

We focus our corporate responsibility and sustainability strategies in four primary areas where AFG can achieve the most direct and substantial results:

- Operating our business with integrity and managing financial risk
- Giving back to our communities and promoting social opportunity
- Creating a welcoming, rewarding and safe place to work and build a career *Be here. Be great.*
- Managing environmental risk and operating sustainably

for the *greater* good

2024 Business Plan Assumptions

- **Beginning in 2024, AFG will no longer provide earnings guidance or other guidance measures. Instead, the following estimates and assumptions underlying our 2024 Business Plan are offered to assist investors and analysts with their modeling:**
 - **Growth in net written premiums of 8% from the \$6.7 billion reported in 2023**
 - **A combined ratio comparable to the 90.3% achieved in 2023**
 - **A reinvestment rate of approximately 5.5%**
 - **An annual return of approximately 6% on AFG's \$2.4 billion alternative investments portfolio**
- **We expect that performance in line with these business plan assumptions would result in core operating earnings per share of approximately \$11.00 for 2024, generating a core operating return on equity excluding AOCI of approximately 20%.**
